

Bibash Bayalkoti

Django Developer

Kirtipur, Kathmandu, +977 9818176331 bayalkotibibash@gmail.com

[LinkedIn](#) | [Bibash02](#)

Motivated BCA student with hands-on experience in backend development using Python, Django, and RESTful APIs. Eager to secure a Python/Django internship to contribute to real world projects, enhance technical skills, and gain industry exposure in web application development.

EDUCATION

Bachelor

Shahid Smarak College

Kathmandu

Jan, 2022 - Present

NEB

Mangal Secondary School

Kathmandu

Apr, 2020 - Apr, 2022

SEE

Bakreswor Secondary School

Gorkha

Apr, 2010 - Apr, 2020

PROJECTS

Project 1: Advanced E-commerce Platform

Developed a full-stack role-based E-Commerce web application using Django with authentication, product management, cart, order processing, and eSewa payment integration. Implemented recommendation systems using collaborative and content-based filtering, along with analytics dashboards using Pandas. Built using Django, PostgreSQL/SQLite, HTML, CSS, and JavaScript.

- Developed a role-based e-commerce platform with Customer, Supplier, Delivery, and Admin modules
- Implemented secure authentication & authorization for multi-user access control
- Built core features: product browsing, cart, order management, and order tracking
- Integrated eSewa payment gateway for secure online transactions
- Developed RESTful backend using Django & Django ORM with SQLite/PostgreSQL
- Built responsive frontend using HTML, CSS, JavaScript
- **GitHub:** <https://github.com/Bibash02/Advanced-E-Commerce-Platform>

Project 2: Enhanced Learning Management System

Developed a Learning Management System (LMS) with role-based access for Admin, Instructor, Student, and Sponsor using Django. Implemented course management, enrollments, assessments, sponsorship tracking, analytics dashboards, email notifications, and secure CRUD operations with PostgreSQL integration. Built using Django, Python, HTML, CSS, and JavaScript.

- Developed a full-stack Django application using templates for frontend and REST APIs for backend functionality.
- Implemented user authentication, course creation/management, student enrollment, and progress tracking features.
- Integrated ModelViewSets and routers in Django REST Framework for scalable API endpoints, handling data for multiple users.
- Utilized PostgreSQL database for efficient data storage and retrieval; tested APIs with Postman for robustness.
- **GitHub:** https://github.com/Bibash02/Enhanced_Learning_Management_System

Project 3: Library Management System

Developed an API-driven Library Management System using Django REST Framework with book management, issue/return tracking, and role-based access control. Implemented validations to prevent duplicate borrowings and managed MySQL database migrations for reliable system integration and performance.

- Built an API-driven system using Django REST Framework to manage books, borrowing records, and user roles.
- Implemented book management (add/update/delete), issue/return logic, and role-based access control for admins and users. Handled database migrations to resolve schema issues, ensuring seamless integration with MySQL.
- Added validations and constraints to prevent errors like duplicate borrowings, improving system reliability.
- **GitHub:** <https://github.com/Bibash02/LMS>

ACHIEVEMENTS

Developed and completed multiple full-stack web applications including an E-Commerce system, Learning Management System (LMS), and Library Management System using Django and Django REST Framework.

Implemented real-world features such as role-based authentication, payment integration (eSewa), recommendation systems, and analytics dashboards.

Built and deployed academic and personal projects demonstrating practical experience in backend development, API creation, and full-stack web development.

Maintained a GitHub repository showcasing complete project implementations and source code for portfolio and learning purposes.

Gained hands-on experience in Django, Python, MySQL/PostgreSQL, HTML, CSS, and JavaScript through project-based learning.
